members.

At Optum360<sup>®</sup>, our partnership with APTA is important. We work together to develop unique coding solutions that meet the specific needs of physical therapy. That's why we offer APTA members discounts on the coding resources they rely on every day.

**Simplify coding and billing with the resources developed exclusively for the physical therapist — from Optum360 — and APTA.**

**AS AN APTA MEMBER, ENJOY A SPECIAL OFFER — SAVE 20% OFF THE 2017 CODING AND PAYMENT GUIDE FOR THE PHYSICAL THERAPIST AND 40% OFF THE FAST FINDER<sup>®</sup>.**

#### 2017 Coding and Payment Guide for the Physical Therapist

The *Coding and Payment Guide for the Physical Therapist* is your one-stop coding, billing and documentation guide to submitting claims with greater precision and efficiency. It provides all the information you need — organized the way you work — to support accurate, timely reimbursements.

#### 2017 ICD-10-CM Fast Finder for Physical Therapy

The *2017 ICD-10-CM Fast Finder* series represents a new generation of *Fast Finder* that use our patented Optum360 Xpress Coding Matrix<sup>™</sup>. The new *ICD-10-CM Fast Finder* series present codes by specialty in an easy-to-use table lookup format, making code selection in the new coding system simple. And with increased specificity, ICD-10-CM offers more diagnosis codes to accurately reflect patient condition and support medical necessity.

Pre-order your resources today  
to meet the unique needs of  
physical therapists.

## Stair Climbing Cane

### University Study of the Portable EZ-Step

EMG (Electromyographic) activity was reduced in all four muscles

- ▲ Rectus femoris, biceps femoris, gluteus maximus and gastrocnemius

ROM (Range of Motion) showed a reduction of peak hip and Knee

- ▲ Hip – resulting in 28% less peak hip during ascent
- ▲ Knee – resulting in 35% less ROM for both ascending and descending

**Joint Contact Force**

- ▲ Portable EZ-Step may reduce joint contact force & falls
- ▲ Ideal for persons with degenerative joint disease

**Lightweight**

- ▲ 2 lbs.

*“I just bought the EZ Step and love it! I have a terrible time getting up and down steps. This was the answer I needed. Works exactly as they say”*  
— C. Harkins

## MOUNTING EVIDENCE OF IMPROVED OUTCOMES FOR STROKE PATIENTS.

InMotion Neurorecovery Systems feature the world's most thoroughly researched upper extremity neurorehabilitation technology. The truth is InMotion ARM/HAND and InMotion WRIST have been used in scores of studies involving over 1200 clinical subjects. The resulting research papers, published in leading clinical and scientific journals, clearly show improvement in both adults and children with moderate to severe impairment, even years post-stroke. Research is available at <http://bionikUSA.com/clinical-research/>.

Right now, treatment protocols developed for InMotion Neurorecovery Systems are being used in acute, sub-acute and chronic treatment settings to improve the quality of life of stroke survivors. Moreover, based on data derived from multiple clinical trials, in which many InMotion systems were used, the AHA 2016 Guidelines for Adult Stroke Rehabilitation recommend treatment of upper extremity paresis with robot assisted therapy to deliver more intensive practice. **BIONIK**

Learn more about how InMotion Neurorecovery Systems can improve outcomes for your patients:

# Improve your revenue and collections.

End-to-end revenue cycle services to increase billing consistency, efficiency, and cash flow.

**“Our average collected rate has increased 25% by taking billing out of therapists’ hands and letting the system track treatments and handle coding.”**

Craig Zettergren, PT, Owner, FyzicalCT

Visit booth #415 at the **APTA Private Practice Section Annual Conference** to learn how we can improve the financial health of your clinic.
